

Advanced flooring panels for the bus and coach industry.

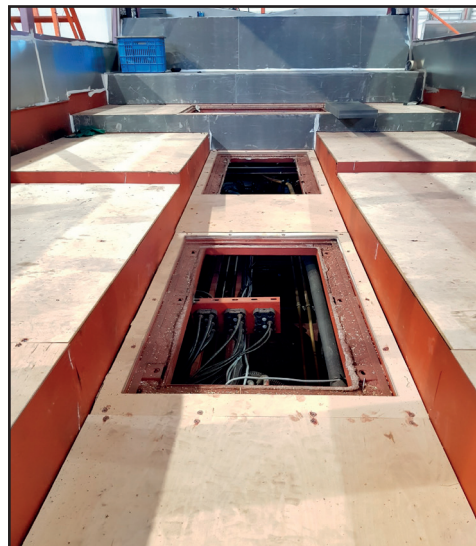

KoskiBus - Koskisen solution for buses.

For decades Koskisen has made cooperation with its bus producing customers in order to develop innovative and high quality products for this demanding end use.

Widely used in the global transportation industry, Koskisen plywood is exceptionally strong and comes with full test data enabling it to be easily and correctly specified by your engineering department.

Koskisen products are versatile and enable the customer to choose the most efficient solution for their application:

- KoskiSound F a floor solution which provides increased fire protection and which also reduces the transmission of sound and vibration. The high surface tension of the specialist coating supports excellent adhesion values.
- KoskiBond provides high bond strength . The high surface tension of the coating supports excellent adhesion values.
- KoskiForm & KoskiStandard are the perfect solution for standard applications with less demanding technical requirements.
